FULL STACK DEVELOPER - Leveraging 7+ years of experience

Dedicated and results-driven **Full Stack Developer** with over **7 years of experience** building scalable web and mobile applications. Proficient in **Laravel, ASP.NET/.NET, React Native, Angular, and Blazor**, with expertise in **full-stack development, RESTful APIs, database design, and cloud deployment**. Experienced in delivering end-to-end solutions, writing clean and maintainable code, and collaborating with Agile teams to build reliable, user-focused applications.

CORE COMPETENCIES

- **Programming & Web Languages:** C#, Java, PHP, JavaScript, HTML, CSS, SASS, jQuery, Ajax
- **Frontend Frameworks & Libraries:** React Native, ReactJs, NodeJs, NextJs, Angular, Bootstrap, Tailwind CSS, WordPress, Shopify, Blazor
- **Backend & Web Frameworks:** Laravel, Symfony, CodeIgniter, ASP.NET Web API, PHP RESTful API
- **Databases & Query Languages:** SQL, MySQL, SQL Server, Supabase, MariaDB
- **System Architecture & Solution Design:** Solution Architecture, System Design, API Design & Integration, Database Design & Normalization, Technical Documentation, Business Flow Documentation, Requirements Analysis, System Integration Design
- **Leadership & Software Engineering:** Technical Leadership, Code Review, Cross-functional Collaboration, Client Technical Discussions, Technical Estimation & Planning
- **Mobile Development:** Android Studio, Xamarin Forms
- **Reporting Tools:** SSRS Reports, SQL Server Mobile Report, Crystal Reports
- **Tools & IDEs:** Visual Studio, VS Code, Photoshop, Postman, Git, GitHub, Gitlab, Bitbucket
- **Enterprise Systems:** SAP
- **Platforms & OS:** Linux (Ubuntu/CentOS), Windows
- **Cloud & DevOps:** AWS (EC2, S3), Docker, Firebase, Linux (Ubuntu/CentOS)
- **AI-Assisted Software Development:** ChatGPT, GitHub Copilot, Claude, Codex, AWS Bedrock

PROFESSIONAL EXPERIENCE

Trends Group Inc	June 2025 – Present
Web Development Senior Specialist	
• Design, develop, and enhance web applications, websites, and internal business systems that meet performance, scalability, and maintainability standards. • Configure, customize, and integrate ITSM and workflow-based enterprise platforms, turning business processes into automation and self-service features. • Build and maintain integrations with third-party and enterprise systems through APIs and middleware. • Apply approved AI-assisted development tools across requirements, design, coding, testing, and documentation, validating every output for accuracy and security. • Mentor developers and oversee team deliverables, including estimation, code reviews, defect resolution, and escalation of delivery risks. • Drive quality and continuous improvement through secure coding, vulnerability remediation, production troubleshooting, and root cause analysis.	
Zen Business Solution Inc. (Part-time)	June 2025 – Present
Full Stack Developer	
• Develop, maintain, and optimize server-side applications using Next.js, Firebase and other frameworks. • Design and implement scalable back-end architectures that ensure high performance and security. • APIs and third-party services to enhance product functionality. • Collaborate closely with front-end developers, product managers, and designers to deliver seamless user experiences. • Monitor, debug, and improve system performance, ensuring reliability and scalability. • Stay up-to-date with emerging technologies, particularly AI-related tools and frameworks.	

Open Point (MySite)**June 2025 – Present****Full Stack Developer**

- Develop key features and services from design, development, testing, and deployment, delivering scalable web applications using PHP, JavaScript (jQuery, Vue.js, Vanilla JavaScript), .NET, and SQL.
- Provide technical support for critical production issues, including triage, system analysis, root cause investigation, and postmortem activities.
- Contribute to the team's success through code reviews, feature testing, and adherence to quality, performance, and security best practices.
- Collaborate with cross-functional teams to define and implement the architectural direction for new features and system enhancements.
- Prepare effort estimates for well-defined and properly scoped development tasks.
- Participate in developer meetings, sprint planning, and daily stand-ups, contributing technical knowledge and recommendations.
- Troubleshoot, debug, and resolve software defects to ensure application stability and performance.

Rococo Global Technologies Corp.**January 2023 – June 2025****Mid-Level & Senior Developer**

- Led the development of scalable web and mobile applications using Laravel, React.js, Node.js, and React Native.
- Designed and optimized backend services, improving performance, security, and scalability.
- Played a key role in project decision-making and architectural improvements.
- Collaborated with cross-functional teams to ensure seamless project execution.
- Took ownership of key projects, overseeing end-to-end development and deployment.

Bounty Fresh Inc.**October 2019 – December 2022****Developer**

- Designed and implemented internal tools to automate reports and improve workflow efficiency.
- Managed and executed new projects independently, overseeing development, and optimization.
- Enhanced and optimized existing processes across multiple departments, reducing manual effort and improving productivity.
- Provided System Support, resolving technical issues and ensuring system stability across teams.
- Collaborated with stakeholders to identify and develop tailored solutions for department-specific needs.

ACADEMIC CREDENTIALS

- **Bachelor of Science in Information Technology | STI College Ortigas Cainta 2019**
